

correl A3

This object, as well as further objects which will become apparent from the discussion that follows, are achieved, in accordance with the present invention, by providing compartments for the chemical components, which are adapted to be broken up by the initial acceleration forces and/or the centrifugal forces applied to the projectile when it is fired, and by providing a hood, surrounding the compartments, which is formed of optically transparent material to enable the trajectory of the practice projectile to be tracked.

[On page 4, change lines 1-3 to read as follows:

For a full understanding of the present invention, reference should now be made to the following detailed description of the preferred embodiments of the invention as illustrated in the accompanying drawings.

BRIEF DESCRIPTION OF THE DRAWINGS;

[and after line 9, insert the following heading and paragraph:

DESCRIPTION OF THE PREFERRED EMBODIMENTS

AS

The preferred embodiments of the present invention will now be described with reference to Figs. 1 and 2 of the

concl A5

drawings. Identical elements in the various figures are designated with the same reference numerals.

On page 5, after the last line, insert the following paragraph:

There has thus been shown and described a novel practice ammunition projectile which fulfills all the objects and advantages sought therefor. Many changes, modifications, variations and other uses and applications of the subject invention will, however, become apparent to those skilled in the art after considering this specification and the accompanying drawings which disclose the preferred embodiments thereof. All such changes, modifications, variations and other uses and applications which do not depart from the spirit and scope of the invention are deemed to be covered by the invention, which is to be limited only by the claims which follow.
